School\_Name: Metro State College

Author: Keit hNorwood

Email: norwoori@mscd.edu

Report\_Date: 02-25-2004

Missions: VideoSat, RoverSat, SolarSat

Current\_Progress: Last week, our demoSat II group narrowed down their missions to 2 definite: roverSat and videoSat; and 3 possibilites: solarSat, windSat, and attSat. As we go further along into the design process, we will decide whether to include all, some, one, or none of the possible missions mentioned above. This will depend on weight limitations, ability to integrate with other 2 missions, and design focus.

Our focus now is on brainstorming ideas...

Upcoming\_Milestones: Telecon on Wednesday, 3/4/04

Current\_Weight: 1.4 kg

Questions\_Comments:

Launch\_Date: August 7, 2004
