School_Name: University of Northern Colorado

Author: Pat Mills

Email: mills.p@comcast.net

Report_Date: 02-25-2004

Missions: CosmicSat

Current_Progress: We are currently working on the pressure chambers for the PMTs with success. The general design for the detector appears sound and the coincidence counter circuit is built. All materials have arrived so construction and testing will ensue with vigor.

Upcoming_Milestones: Lots of testing individual parts of the detector and then testing the detector as a whole. Preparation for the launch readiness review continues.

Current_Weight: Over 1.7 kg (Call Chris)

Questions_Comments:

Launch_Date: April 17, 2004
