School_Name: Western State College

Author: Ted Violet

Email: tviolet@western.edu

Report_Date: 03-24-2004

Missions: SolarSat, ChemSat

Current_Progress: Little progress to report since last week was spring break. Components for the instrumentation are nearly all here. We hope to make ozone within the next day or so.

Upcoming_Milestones: Make and detect ozone by March 29.

Current_Weight: 1.5 kg

Questions_Comments: Students have been working on presentations for the symposium. Some of these will relate to other projects they have done.

Launch_Date: August 7, 2004
